📍 Tan Binh District, Ho Chi Minh City 🌐 [portfolio.khangyuno.id.vn](https://portfolio.khangyuno.id.vn)

## PROFILE

Software Developer with hands-on experience building full-stack web applications using Java Spring Boot and ReactJS. Experienced in developing RESTful APIs, implementing authentication with JWT and Keycloak, working with PostgreSQL and Redis, and deploying applications using Docker and GitHub Actions. Completed a 9-month internship at FPT Information System, contributing to internal banking e-form systems at ACB Bank. Seeking a Junior Java/React Developer role to further strengthen backend, frontend, and system design skills.

## EXPERIENCE

11/2024 – 07/2025  
Ho Chi Minh City

### FPT Information System

Software Developer Intern

- Developed an internal Bookstore Management System using Java Spring Boot, ReactJS, PostgreSQL, and Keycloak authentication.
- Built RESTful APIs, reusable frontend components, role-based access control, and order management features.
- Supported production maintenance for ACB Bank's internal digital banking e-form systems.
- Fixed bugs, performed functional and regression testing, and created technical documentation following team standards.
- Collaborated with senior developers and QA members to investigate issues and deliver stable updates.

## PROJECTS

12/2024 – 06/2025

### PACIFIC TRAVEL WEBSITE

Software Developer

GitHub: <https://github.com/Khang1z2t/PacificBE>

- Developed a full-stack tour booking platform using Spring Boot, ReactJS, PostgreSQL, Redis, and Docker.
- Built RESTful APIs for authentication, tour management, booking, payment processing, and transaction handling.
- Implemented JWT authentication, role-based access control, Redis caching, VNPAY payment integration, and Gemini API recommendations.
- Optimized SQL queries and migrated the database to Supabase PostgreSQL, improving page load time by 45% under load testing.
- Deployed and maintained the system using Docker, Nginx, GitHub Actions CI/CD, and VPS hosting.
- Continued improving deployment configuration, database migration, and feature refinements after initial release.

**Tech:** ReactJS, Ant Design, Tailwind CSS, Spring Boot, Redis, Docker, PostgreSQL.

12/2024 – 02/2025

### BOOKSTORE WEBSITE

Software Developer

GitHub: <https://github.com/Khang1z2t/BookStore>

- Developed a CRUD web application for book, user, and order management using ReactJS and Spring Boot.
- Built RESTful APIs and integrated PostgreSQL for data storage.
- Implemented Keycloak authentication with role-based access control.
- Integrated Camunda workflow engine for basic order processing automation.

**Tech:** ReactJS, Spring Boot, PostgreSQL, Keycloak, Camunda.

## SKILLS

### TECHNICAL SKILLS

- Languages:** Java, TypeScript, JavaScript, SQL
- Frontend:** ReactJS, HTML, CSS, Ant Design, Tailwind CSS
- Backend:** Spring Boot, Spring Security, Node.js, RESTful APIs, JWT, Keycloak
- Database & Caching:** PostgreSQL, Redis
- DevOps & Deployment:** Docker, GitHub Actions, Nginx, DigitalOcean, Supabase, Vercel
- Tools:** Git, GitHub, Postman, Swagger
- Others:** Camunda, Google Gemini API, prompt engineering, basic AI agent workflows

### SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Technical Documentation
- Continuous Learning
- Adaptability

## LANGUAGE

### English

Intermediate

### Vietnamese

Native

## EDUCATION

### FPT Polytechnic College

Software Development

12/2022 – 05/2025 | Ho Chi Minh City

**GPA:** 3.54 / 4

## CERTIFICATES

### Academic Preparatory English

Level 3 - Topnotch 2, 2025
